I. Commonwealth Care

Overall Commonwealth Care membership remained steady in Q2FY12, compared to Q1FY12. Network Health and CeltiCare have continued to increase membership since the beginning of FY12, due to the new program rules implemented in July that resulted in PT1 membership shifting to lower cost plans. Network Health, for the 2nd straight quarter, has remained the largest health plan in Commonwealth Care.

CommCare Chart 1: Quarterly total enrollment for FY12 Q2

Net enrollment remained steady following a slight increase between the third and fourth quarters of FY11. Percentage enrollment by non-premium paying members returned to historical levels after increasing by approximately 5% in FY12 Q1.

CommCare Chart 2: Quarterly Additions/Terminations (excluding plan changes) for FY12 Q2

II. Commonwealth Choice

As of December 2011, there were 41,332 paid members (28,409 paid subscribers and 12,923 dependents). Enrollment decreased slightly from the previous quarter by 768 members. This can be attributed to the closed enrollment period of the non-group market that is now in effect.

On November 1, 2011, Boston Medical Center HealthNet Plan (BMCHP) became the eighth carrier to participate in Commonwealth Choice. BMCHP is now available for Non-Group Individuals and Families, Voluntary Plan participants, and Business Express employers. Subsequent reports will provide enrollment statistics for BMCHP.
